

CHEMFIX 10

Pure Epoxy RESIN

• CARTRIDGE SIZES

400ml | 600ml

A two component chemical anchoring injection system in 1:1 ratio. A formulation derived from pure epoxy with very high bond strength, developed principally to anchor threaded rods and rebar into concrete. Used for high performance structural applications where loading is critical.

• CHARACTERISTICS

- Suitable for high loads featuring large diameters and deep embedments.
- Longer working times make it suitable for large holes, and high temperatures.
- No shrinkage, good for large diameter fixings.
- Use in wet or flooded environments and fixing holes, or underwater.
- High durability, resistance to chemicals.
- Used for diamond drilled holes.
- Solvent free resin.
- Fixings in concrete, wood, or other high strength materials.
